	Wilson Lee	2821
The MAILING DATE of this communication appears on the cover sheet with the correspondence address All claims being allowable, PROSECUTION ON THE MERITS IS (OR REMAINS) CLOSED in this application. If not included herewith (or previously mailed), a Notice of Allowance (PTOL-85) or other appropriate communication will be mailed in due course. THIS NOTICE OF ALLOWABILITY IS NOT A GRANT OF PATENT RIGHTS. This application is subject to withdrawal from issue at the initiative of the Office or upon petition by the applicant. See 37 CFR 1.313 and MPEP 1308.		
1. This communication is responsive to <u>10/24/03</u> .		
2. The allowed claim(s) is/are <u>1-13</u> .		
3.  The drawings filed on <u>04 May 2004</u> are accepted by the Examiner.

PRIMARY EXAMINER

Application/Control Number: 10/691,976

Art Unit: 2821

## Allowable subject matter

Claims 1-13 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art neither discloses nor suggests the following limitation, in combination with the remaining elements disclosed in the independent claims:

- a reset driver generating a reset pulse for initializing the state of the capacitive light emission device based on the sum of the first voltage generated by the first power source and the second voltage generated by the second power source, and applying the reset pulse to the row electrode such as required by claims 1 and 8.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

## Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Ishizuka (6,717,557) discloses a driving apparatus and driving method of an AC type plasma display panel comprising a reset driver for outing reset pulses common to all of scan electrodes. Setoguchi et al. (6,707,436) discloses a plasma display panel comprising a step of supplying reset pulse to all X-electrodes. Kishi et al. (6,686,912) discloses a step of summing sustain pulse voltage and write voltage and then being supplied to the sustainer circuit. Kojima et al. (6,072,448)

Page 3

discloses a plasma display device comprising a step of calculating total length of sustaining discharge periods then being added with total length of the reset periods.

The references cited above do not disclose the claimed invention.

## Correspondence

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner Wilson Lee whose telephone number is (571) 272-1824.

Papers related to Technology Center 2800 applications may be submitted to Technology Center 2800 by facsimile transmission. Any transmission not to be considered an official response must be clearly marked "DRAFT". The official fax number is (703) 872-9306.

Information regarding the status of an application may be obtained from the Patent Application Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <a href="http://pair-direct.uspto.gov">http://pair-direct.uspto.gov</a>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
